

Waste directory for the administrative district of Bayreuth

The most important arrangements in few words

Effective: August 2018

i Waste bins

Forms for the registration and deregistration of waste pins are available at www.landkreis-bayreuth.de/abfall or at the district administration respectively the community office. All blanks must be signed by the property owner. Residual waste bins are available in the measurements of 60 / 80 / 120 / 240 / 1.100 litres; bio waste bins in the measurements of 120 / 240 litres and paper bins in the measurements of 240 / 1.100 litres. Per every inchoate 120 litre residual waste capacity 120 litre bio waste capacity are allocated. If the capacity of the residual waste or bio waste bin is not enough, it is possible to obtain bags for residual waste respectively bio waste for a fee of 3,- \in per bag at the local administration. Residual waste in great quantities can be delivered to the waste transfer station against a fee. Please inform the district administration immediately by phone or in writing, if your bin is damaged.

Furthermore, the dual systems provide yellow bins (240 litres) for the collection of potential recyclable wastes (packaging made of plastic, tinplate, aluminium or polystyrene). To request the yellow bin please apply to the service hotlines 0800 / 07 85 600 or 0921 / 93 05 851. An application via blank is impossible.

i Garbage disposal

The disposal of residual waste and bio waste occurs every 14 days. The emptying of waste paper and the yellow bin occurs every 4 weeks. Please place your bins no later than 6 a.m. clearly visible and accessible at the place, which may be arranged with the district administration. Your bins should not be a danger or obstruction to pedestrians or vehicles. Bins are allowed to be filled only as far as the lid still closes. The compaction of waste is not allowed. If the approach of the refuse truck is impossible because of a construction site, the waste bins have to be located at the next spot which is possible to be approached. Parking vehicles often complicate or inhibit the correct emptying of the bins by the refuse truck. Additionally, in winter there are often cramped road conditions. If the passage is blocked for a refuse truck, the garbage collector will start a new attempt to reach this particular street section. If this can still not be achieved, the waste bins will stay remain not emptied out.

i Waste collection calendar

A personal waste collection calendar is available at www.landkreis-bayreuth.de/abfall.

i Waste disposal fees

The waste disposal fees depend on the household size, whereby a minimum capacity graded on the scale of the household size is compulsory. For the household size, the persons with principal or secondary residence are decisive. Even if the level of the fee is linked to the measurement of the residual waste bin, the environmental waste disposal contains much more than the disposal of the residual waste; because services like the disposal of bulky waste, hazardous waste, old electric devises and potential recyclables, waste advisory, replacement of waste bins as well as construction and operating costs for the necessary waste disposal system are included in the waste disposal fees.

Maximal admitted	Annual fee	Annual fee	Minimum size of the
numbers of persons	incl. bio waste bin	with own composting *	residual waste bin
3	122,40 €	110,16 €	60 litres
5	163,20 €	146,88 €	80 litres
7	244,80 €	220,32 €	120 litres
14	489,60 €	440,64 €	240 litres
55	2.244,00 €	2.019,60 €	1.100 litres

^{*} With own composting you can get a 10 % reduction of fees

Waste disposal fees can be paid comfortably by direct debit authorisation, which can be cancelled at any time. Fees can only be debited to the account of the property owner. Please pass on changes regarding property owner or the bank account to the district administration in writing. If neighbours use waste bins jointly, some disposal fees might possibly be saved. But it is necessary for all participating property owners to file an application. Please pay attention to the due date: all announcements of change, which come in by the 20th of each month, can be considered by the next turn of the month.

The dual systems provide yellow bins free of charge for collection of potential recyclable wastes (packaging made of plastic, tinplate, aluminium or polystyrene). To request the yellow bin please apply to the service hotlines 0800 / 07 85 600 or 0921 / 93 05 851.

Disposal of potential recyclable waste

For the disposal of potential recyclable wastes (e.g. packaging made of plastic, tinplate, aluminium, polystyrene) the yellow bin has to be used. The yellow bin is provided by the Dual Systems and is free of charge. To request it please apply to the service hotlines 0800 / 07 85 600 or 0921 / 93 05 851. Furthermore there are publicly available container stations for waste glass.

This packaging belongs into the yellow bin:

1. Plastic packaging

■ Plastic beakers and bottles

Examples: yoghurt, curd or margarine cups and other beakers, shampoo bottles, bottles of washing liquids or plastic canisters.

Attention: Bins, in which toxic materials were contained (e.g. disinfectant or pesticides from agriculture), are **not allowed** to be thrown into the yellow bin. These repositories belong into the residual waste bin, if empty. Remaining quantities have to be disposed as problematic waste.

■ Packaging foil

Examples: shopping bags, shrink-wrap foils, "crackle foils" like bags of chips.

■ Moulded components made of polystyrene

Examples: packaging of electric devises, polystyrene chips.

■ Other plastic packaging material (mixed plastics)

Examples: plastic buckets, plastic fastener, corks, plastic flower pots as well as all other plastic packaging materials without particular identification.

Note: In paint or varnish buckets a low remain of dried up paint respectively varnish is accepted. Bins with fluid paint or varnish remains belong to the problematic waste, the ones with dried up remains can be put into the residual waste bin.

2. Composite beverage cartons (packaging made of various materials which cannot be separated by hand)

Examples: milk cartons, juice cartons, gravy containers.

3. Tinplate packaging

Examples: tin cans, beverage cans, empty spray cans.

4. Aluminium packaging

Examples: aluminium foil, coffee capsules.

🚺 Disposal of green waste / garden waste

In each community delivery of green waste free of charge to the garden waste containers or the local composting plants is possible (up to a maximum of 1 cubic metre/ month). Organic waste is processed into high quality compost at altogether seven composting plants in the administrative district of Bayreuth. Kitchen waste and garden waste is turned into compost, a valuable fertilizer and soil conditioner, which provides for a healthy plant growth. Therefore the natural cycle is closed.

Composting plant "Am Buchstein"	Staatsstrasse Bayreuth- Mistelbach, branch at Gut Geigenreuth	phone: 0921/1506782	Mon - Fri: 7 am - 5 pm Sat: 7.30 am - 1 pm / Dec - Feb: Mon - Fri: 8 am - 4 pm
Composting plant Pegnitz	Weidmannshöhe 15, 91257 Pegnitz	phone: 09241/483720	Mon, Tue, Thu, Fri: 7 am - 4 pm Wed: 7 am - 12 pm / Apr - Oct additionally Thu: 4 pm - 6 pm Sat: 9 am - 12 pm
Composting plant Bindlacher Berg	Goldkronacher Strasse 34, 95463 Bindlach	phone: 09208/5884963	Mon - Fri: 8 am - 5 pm Sat: 7.30 am - 11.30 am / Dec - Feb: Mon - Fri: 8 am - 4 pm
Composting plant Köhler GbR	Mergners, 91282 Betzenstein	phone: 09244/8241	Mon - Fri: 7 am - 8 pm Sat: 7 am - 6 pm
Composting plant D + S Kompost GmbH	Löffelweg 1, 96142 Hollfeld	phone: 09274/80321	Mon - Fri: 7 am - 8 pm Sat: 7 am - 6 pm
Composting plant Reinhard Stoll	Görau 5, 95466 Weidenberg	phone: 09278/985720	Mon - Fri: 9 am - 6 pm Sat: 9 am - 4 pm
Composting plant Unterwaiz (only for citizens of the community of Heinersreuth)	Am Berg, Unterwaiz, 95500 Heinersreuth	phone: 09203/686178	End of Mar - mid Nov: Sat: 3 pm - 5 pm / during summertime additionally Wed: 6 pm - 7 pm

i Donating instead of littering!

Many things, which end up on the bulky waste or in the residual waste bins, are too valuable to be thrown away. A good alternative is offered from second hand department stores, which operate non-profit. They accept furniture (only Kaufhaus Regenbogen), household goods, electric devices, textiles, shoes, toys, books and a good deal more.

Kaufhaus Regenbogen	Ottostrasse 1, 95448 Bayreuth	phone: 0921/1501420	Mon - Fri: 9 am - 6 pm / Sat: 9 am - 12 pm
RotKreuz-Laden	Prieserstrasse 4, 95444 Bayreuth	phone: 0921/403427	Tue - Fri: 10 am - 6 pm / Sat: 10 am - 3 pm

Collection of bulky waste / old electric devices

Up to four times a year burnable bulky waste, metallic bulky waste and old electric devices in common household amounts are getting picked up for free, if ordered in writing. For the application there is a special application card available at the district administration as well as the community office. Applications are also available at www.landkreis-bayreuth.de/abfall. Florescent tubes and energy saving lamps will not be collected, but can rather be taken to the electrical equipment discharge points respectively the mobile collection for problematic waste.

Examples for burnable bulky waste, which can be picked up:	air mattresses / armchairs / beds / big toys / carpets / chairs / chests (empty) / children's safety seats / couches / cupboards / desks / garden furniture / garden hoses / ironing boards / linoleum floors / mattresses / picture (frames) / PVC floors / scratching posts / screens / shelves / slatted frames / sports equipment / suitcases (empty) / tables / watering cans
Examples for metallic bulky waste, which can be picked up:	baking trays / beds / bicycles / big toys / chairs / cupboards / garden furniture / oil stoves (cleaned, without oil and fireclay) / shelves / sports equipment / tables / watering cans / wood stoves
Examples for used electric devices, which can be picked up:	air conditioners / baking ovens / copiers / computers / dryers / electric dish washers / electric fans / electric heaters / electric lawn-mowers / electric stoves / ergometers / freezers / microwave devices / refrigerators / sewing machines / stereo systems / treadmills / vacuum cleaners / washing machines

Delivery of bulky waste / old electric devices

Additional to free pick up of bulky waste and old electric devices by order, delivery of these items to the admitted discharge points is possible. By exclusive respectively separate delivery of burnable waste to the waste transfer station, the delivery is free of charge. The delivery of metallic bulky waste and old electric devices is also free.

Delivery of burnable bulky waste:

Müllumladestation (Waste transfer station) Bayreuth	Weiherstrasse 39, 95448 Bayreuth	phone: 0921/13791	Mon - Fri: 8 am - 12 pm, 12.45 pm - 4 pm after public holidays generally also the following Sat from 8 am - 12 pm (except Holy Saturday)
---	-------------------------------------	----------------------	--

Delivery of metallic bulky waste:

Schrotthändler (junkyard) Bilsheim Recycling	Weiherstrasse 37, 95448 Bayreuth	phone: 0921/789190	Mon - Fri: 7 am - 4 pm
--	-------------------------------------	-----------------------	------------------------

Delivery of old electric devices:

Gewerbemüllsortieranlage (sorting plant for industrial waste)	Im Letterer 2, 95463 Bindlach	phone: 09208/9375	Fri: 11 am – 5 pm
Veolia Umweltservice Süd	Kleiner Johannes 4-6,	phone:	Thu: 2 pm – 8 pm
GmbH & Co. KG	91257 Pegnitz	09241/988206	

Disposal of hazardous wastes / problematic wastes

Hazardous household wastes have to be collected separately disposed environmentally sound (e.g. used oil, solvent, fuel, energy saving lamps, remains of liquid varnish). For this purpose take-back obligations of producers, which are plenty at hand, can be used primarily. For example, car batteries and used oil have to be retracted free of charge on presentation of the receipt. By no means may hazardous wastes be disposed into the residual waste or even the bio waste bin. In common household amounts they can be delivered to the mobile environmental collection, which approaches all communities of the district throughout the year. Dates of the problematic waste collection can be enquired at www.landkreis-bayreuth.de/abfall or under 0921/728-282.

Disposal of construction wastes

Construction wastes are all wastes which arise through building and renovating operations. To these belong building rubble (brickwork, concrete, tiles, toilet bowls), unlade ground (soil, stones) and construction debris (foamed construction polystyrenes, plasterboards, glass bricks, mineral wool). Items made of metal (fixtures, radiators) and wood (planks, roof beams) as well as packaging materials (polystyrene, foils) can accumulate. With properly and separated disposal the

building contractor saves costs and at the same time renders a valuable contribution to environment protection.

Bauschuttdeponie (Construction waste landfill) Benk	next to motorway A9 exit Bindlacher Berg, 95463 Bindlach	phone: 09208/9375	appointment by phone

Disposal of asbestos containing wastes

The delivery of asbestos cement products is possible at the residue plant Heinersgrund. Thereby safety regulations are to be heeded (among other appropriate protective gear has to be used; transport in dustproof labelled Big-Bag synthetic bags) and the delivery is to be announced by phone in advance. Big Bags can be obtained in different sizes at Dachdecker-Einkauf (Bindlacher Strasse 3, 95448 Bayreuth, Tel. 0921/726450) or at the Bayreuth city construction yard (Am Bauhof 5, 95445 Bayreuth, Tel. 0921/251848). At the residue plant Heinersgrund only none usable wastes can be deposited, matching the plant terms (e.g. plasterboard or asbestos eternity panels). Further regarding delivery can be found the internet at information on www.deponieheinersgrund.bayreuth.de.

Reststoffdeponie Ramsentl (residue landfill) 95463 Bind Heinersarund	phone: 0921/251848 (administration: Stadt Bayreuth, Herr Gras)	Mon: 7 am - 3 pm Wed: 7 am - 12 pm Fri: 7 am - 3 pm
